

Paint your own Outdoor Smoking Can

Paint your own outdoor smoking can and help reduce the effects of secondhand smoke.

Materials:

- Large used coffee can
- Vinegar
- Sand paper
- Primer paint
- Variety of Acrylic paint colours
- Paintbrushes
- Sealer
- Sand

Directions:

1. Save a large coffee can or pick one up at your local recycling centre.
2. To help the primer paint to stick, dip the can in vinegar and allow the can to dry thoroughly before giving it a light sanding.
3. Painting the can with a white primer will help the colors to show up nicely on your finished product.
4. Paint a beautiful scene, a fun design or even the works '4 butts' on the can and allow the paint to dry.
5. Spray on a top clear sealer coat to help preserve your masterpiece.
6. Full the can 2/3 with sand and place it in an area of your yard slightly away from your door.
